Art Unit: 3742

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, the term "dot-like molten metal" is indefinite because it is unclear to define the metes and bound of the "dot-like", since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c).

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 4 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller et al (US 5,289,975) in view of Yamada (US 2003/0051851) and JP2001-293551 all previously cited, and also in view of Olsson et al (US 3,840,623). Miller discloses a method and apparatus for atomizing molten metal comprising a discharge nozzle (10) which melts metal and discharge port for jetting the molten metal from one end of said discharge nozzle (col. 2, lines 55-65). However, Miller does not disclose a pressing body and said discharge nozzle includes a curved surface shaped inner wall and said

Art Unit: 3742

molten metal jetted from said discharge port is dot-like molten metal. Yamada discloses, figure 7, a pressing body (20A), and JP 2001-293551 discloses, figure 2, said discharge nozzle (12) includes a curved surface shaped inner wall (Figure 2). Olsson discloses a molten metal jetted from said discharge port is dot-like molten metal (col. 2, lines 44-47). It would have been obvious to one ordinary skill in the art at the time the invention was made to utilize in Miller a pressing body as taught by Yamada in order to press said molten metal in said nozzle, and said discharge nozzle includes a curved surface shaped inner wall as taught by JP 2001-293551 in order to form a focal point at said discharge port or in the vicinity of said discharge port, and a molten metal jetted from said discharge port is dot-like molten metal as taught by Olsson in order to quench to form powders.

Response to Amendment

- 5. Applicant's arguments with respect to claims 4 and 7 have been considered but are most in view of the new ground(s) of rejection.
- 6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Application/Control Number: 10/551,356 Page 4

Art Unit: 3742

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quang T. Van whose telephone number is 571-272-4789. The examiner can normally be reached on 8:00Am 5:00Pm M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tu Hoang can be reached on 571-272-4780. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
